To the 31st National Convention
of the Communist Party USA
c/o International Department

Brussels, 13 May 2019

Dear Comrades,

On behalf of the Workers' Party of Belgium (PTB-PVDA), I would like to express our militant solidarity on the occasion of your 31st National Convention, taking place in Chicago on 21-23 June 2019.

We share many concerns: humanity is experiencing a profound crisis of the capitalist world economy, of glaring wealth extremes, a refugee crisis, imperialist wars, a growing nuclear danger, other social conflicts, the existential threat posed by the climate and ecological crises, and the rise of fascist and extreme right-wing movements in our respective countries and all over the world.

We salute your continued efforts for the struggle against the right-wing government of Donald Trump and its reactionary measures.

We stand with you in our common fight for another world, in which economic, political and cultural power is in the hands of the workers and their allies.

Against imperialism and the permanent terror waged by the United States and its allies, we need to build an international counter-power uniting the workers, the youth, all exploited, oppressed and marginalized people of the entire world.

Fraternally,

Bert De Belder
Head, Department of International Relations
